

IEEE Journal of Microwaves

“Expanding Science, Technology & Connectivity Around the Globe”

Announcing a new Special Issue: **MICROWAVES IN MEDICINE & BIOLOGY**

Initial Manuscript Submission Deadline: Oct. 1st, 2025

Based on the significant number of papers we have been receiving in the biomedical areas we have decided to put together a special issue on the topic of *Microwaves in Medicine and Biology*. The issue will cover methodologies, theory and analysis, modeling, and instrumentation that involve both microwaves and biomedical applications. We are particularly interested in techniques that have already crossed over into the life sciences, but which are not well represented in the engineering community. We also welcome well-written and up-to-date reviews covering any of the topics below or through suggestions to our special issue editors.

We are soliciting articles on the following topics as well as entertaining alternative suggestions from interested contributors:

- Near-field Microscopy for Biological Fingerprinting and Cellular-Level Processes
- Microwave Therapies, Instrumentation, and Techniques in Medicine
- MRI, DNP, MITAT, and other Microwave or Microwave-Involved Imaging Modalities
- Microwave Heating, Ablation, and Therapies
- Monitoring and Sensing Using Microwaves for Medical Applications (Including Fauna)
- Microwave Absorption and Health and Safety Impacts
- Microwave Tracking, Motion Recording, and Radar for Position and Vital Sign Monitoring
- Design and Deployment of RFID and IoT Devices for Health and Wellness
- Microwave Antennas and Arrays for Signal Transduction, Power Transmission, Sensing & Imaging
- Microwave Instruments and Techniques for In-Body and Trans-Body Communications
- Emerging Medical or Biological Techniques Involving Microwave Devices, Signaling, or Therapies

If you have a particular idea or topic you would like to contribute, please contact special issue editors:

J.C. Chiao (jchiao@mail.smu.edu), Chang-Jun Liu, (cjliu@ieee.org), Sandra Costanzo (sandra.costanzo@unical.it), or JMW Editor-in-Chief, Peter H. Siegel, (phs@caltech.edu).

The deadline for submission of initial manuscripts is Wednesday, **October 1st, 2025**. Final upload of accepted paper proofs is Wednesday, **January 7th, 2026**. All production-ready manuscripts will be posted on IEEE Xplore Early Access and will appear in final paginated sequence in the Special Issue – scheduled for final release in **March 2026**.

Contributed papers should be targeted at ten pages but review and special invited papers can be longer. All submissions will be reviewed in accordance with the normal procedures of the journal. Please tag uploaded papers as “Special Issue” through our [Author Portal](#).

We hope you will consider contributing to this Special Issue of IEEE Journal of Microwaves and continue to support the journal through your regular research submissions.
